REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered (by The Animal Welfare Regulations)	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS (Cols. C + D + E)
4. Dogs	11		4		4
5. Cats					
6. Guinea Pigs					
7. Hamsters					
8. Rabbits			31		31
9. Non-Human Primates	1		54	2	56
10. Sheep					
11. Pigs			32		32
12. Other Farm Animals					
13. Other Animals					
Gerbils		60			60

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL
(Chief Executive Officer or Legally Responsible Institutional official)

FY2006 APHIS Form 7023 Column E Explanation

This form is intended as an aid to completing the APHIS Form 7023 Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 57-R-0002 / 895
2. Species (common name) of animals used in the study: ☒ Non-Human Primates
(check all that apply for this explanation)
3. Number of animals used in this study (b)(6), (b)(7)c (Generated By System)

4. Explain the procedure producing pain and/or distress.

The only distress for which appropriate anesthesia and analgesia will not be used involves the water restriction. ALL ANIMALS will be provided water, while being studied, only in the laboratory. They will be gradually trained to perform a behavioral task, using water as positive reinforcement. Monkeys learn this task and satisfy their daily thirst by working for water. No chemical agents, aside from water, can remove any distress from this manipulation, or course. Monkeys presumably are aware that they will be able to drink each day in the laboratory.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Water restriction is needed to motivate the monkeys to behave appropriately for the scientific aims. These involve (b)(4) Other (b)(4) quantities to spread out (b)(4) taking (b)(4) The water restriction protocol is the best means so far devised for these experiments, and is widely used in the form described here.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):
